WARNING:

Read this instruction manual carefully before using
the projector

Thank you for choosing a PROIETTA product

SAFETY INFORMATION

Please read the following safety information carefully before performing any operation. The product described in this manual is a lighting device for the projection of a light beam indoors and outdoors. Any other use is not intended by the manufacturer and therefore relieves him of any liability for damage resulting from improper use.

Any repair that requires the disassembly of the projector screws must be carried out only by the manufacturer, who declines all responsibility for unauthorized interventions.

Warning: The surface temperature of some components of the projector can reach values high enough to burn if touched directly, during and after the projector is turned off.

Always unplug the projector from the power outlet before performing any maintenance. Risk of electric shock if you disassemble the projector or parts of it.

For reliable operation of the device, the ambient temperature must be between -10 ° C and 35 °C.

The projector must be positioned in such a way that the objects hit by the light beam are at least 1 meter away from the lens of the projector itself.

Never place the projector on flammable and/or combustible surfaces.

Be sure to firmly fix the projector to an architectural element that ensures its stability and reliability. All elements used for installation (screws, bolts, brackets, etc ...) must always be adequate for the load they must support.

Use an M12 bolt with self-locking nut and, in case of suspended installation, use a safety chain.

Do not place objects on the power supply cable and if it is damaged contact the manufacturer for replacement in order to avoid the risk of electrocution.

Be sure to provide adequate ventilation to the projector to protect it from overheating.

The projector must not be placed in a closed installation or in a compartment too small and without sufficient ventilation.

Do not look into the light beam to avoid damaging your eyes.

Never touch the projector and any of its components with wet hands.

TECHNICAL SPECIFICATIONS

MODEL	Mini-LED
POWER SUPPLY	
VOLTAGE	100/240 V
FREQUENCY	50/60 Hz
LED	
RATED POWER	100 W
PROJECTOR LUMINOUS FLUX	7000 lm
COLOR TEMPERATURE	5500 K
LIFE	20.000 h
IP (Degree of Protection)	65
WEIGHT	5 kg
DIMENSIONS	See drawing below (quote in mm)

PROJECTOR USAGE

1) CONNECTION MODE

Connect the supplied power cable to a watertight plug suitable for the country of reference. Keep in mind that:

- yellow cable: grounding.
- brown/blue cable: phase cable/neutral cable. **Regardless of the direction of the pole positive negative.**

2) INSTALLATION MODE

- Fix the metal base to the wall and point the projector in the desired direction.
- Turn on the projector by connecting it to the power source. Unplug the projector to turn it off.
- Loosen the ring and rotate the lens to get a clear image (see below how to insert the gobo correctly), then screw and tighten the ring nut to compact the rubber ring thus ensuring resistance to water.
- The projector is equipped with an adjustable bracket: loosen the two side knobs to allow the projector to be tilted in the desired direction.

Fig. 1

3) GOBO INSTALLATION

- Unscrew and remove the lens after unscrewing the ring.
- Remove the metal elastic ring by pressing the two ends towards each other.
- Carefully insert the gobo with the engraved side facing the inside of the projector.
- Put the metal elastic ring back firmly in position, taking care not to damage the gobo.
- Close the projector by screwing the lens and consequently the ring nut to compact the rubber ring thus ensuring resistance to water.

Fig. 2

WARRANTY

The product is covered by warranty according to the terms of the law (24 months). In case of a malfunction during the warranty period the product will be repaired or replaced at the manufacturer's discretion.

For the use of the guarantee, the following information is essential:

- Purchase date (invoice date applies)
- Detailed description of the problem.

It is essential to follow the safety instructions and warnings contained in this manual.

Any damage caused by non-compliance with the manual will void the warranty. The manufacturer assumes no responsibility for damage or problems caused by non-compliance with the manual.

Any repairs that require disassembly of the projector screws must be carried out only by the manufacturer, who declines all responsibility for unauthorized interventions. Disassembly (even partial) of the projector not carried out by manufacturer voids the warranty.

Consumables are not covered by the warranty.

DECLARATION OF CONFORMITY

The product to which this manual refers complies with the Directives of the European Community. The examination is made evident by the affixing of the CE mark on the product and by the declaration of conformity.

The appliance meets the requirements of Directive 2002/95 / EC (RoHS); of the regulations regarding general safety information: EN 60598-1, EN 60598-2-17 and the directive 2004/108 / EC of the European parliament, relating to electromagnetic compatibility.

DISPOSAL

The appliance must be disposed of in compliance with the laws in force relating to lighting products. In any case it must not be thrown in the normal waste or dispersed in the environment, the latter action, legally pursued, represents a serious danger to animals and people and a long-term source of pollution. The product cannot be treated as a simple urban waste and must be disposed of appropriately in accordance with the regulations in force on the subject of separate waste disposal.
