| • four colors:   | € 290,00 | copies € 190,00 |

## ENDLESS CREATIVE POSSIBILITIES!

discover the **GOBO MAPPING TECHNOLOGY**

Through the printing of gobos (graphics on glass), we create **mapped architectural lighting**. The light is projected in order to emphasize only the most significant architectural elements. This technology has the advantage, compared to traditional methods, of being not invasive because moreover, it totally prevents light pollution and glare in the windows. An innovative system to create not only institutional lighting, but also various kinds of thematic scenographies.

**€ 68,00**

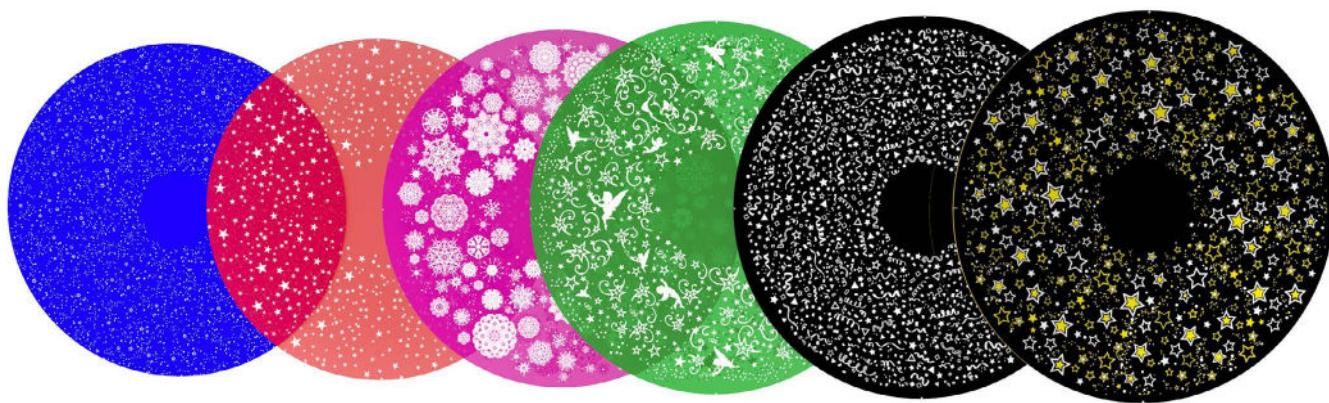

# STANDARD DYNAMIC EFFECT

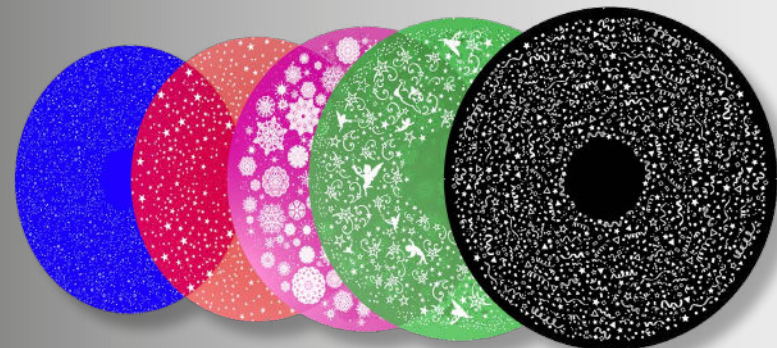

Dynamic effects generally have a size of 176 mm and are necessarily to be combined with a **motor** that makes them rotate on themselves to achieve the **effect of movement**, such as the “falling stars”. Inside the PROIETTA’s e-commerce it is possible to watch a video preview.
